## **Cookies Policy**

### **BEFORE YOU START...**

In this Cookies Policy you will find information on how we use cookies and similar devices installed on the terminals of our customers and users. The use of cookies may sometimes be related to personal data processing, therefore we recommend you consult our Privacy Policy, available on our Platform, if you would like information on how we use the personal data of our customers and users, how to exercise your rights, or the terminology we use to refer to our Platform (Website, App or Physical Stores).

### **INFORMATION ABOUT COOKIES**

#### **1. What is a Cookie?**

A cookie is a small text file that a website, app or other platform stores on your computer, tablet, smartphone or any other similar device, with information on your browsing and use, like a tag that identifies your device. Cookies are necessary, for example, to facilitate browsing and understand how users interact with platforms so they can be improved. They are also useful to provide advertising according to user preferences, as well as for other purposes detailed below. Cookies do not damage your computer or device.

By “Cookies” we are also referring to other, similar technologies used to install and/or collect information on or from your device such as flash cookies, web beacons or bugs, pixels, HTML5 (local storage), and SDK technologies for apps. The term Cookies also applies to the use of fingerprinting, in other words, techniques used to combine information that help us identify your device. These technologies sometimes run alongside cookies to collect and store information, either to provide you with certain features or services on our Platform, or to display third-party advertising according to your browsing.

This explanation is a general overview of what Cookies means and is for informational purposes only. The specific Cookies we use are detailed in the cookies settings panel on our Platform.

#### **2. What type of Cookies are there?**

Please check this section which provides an overview of the type of Cookies that can be used in an online environment.

Cookies can be classified as follows, depending on the owner:

- a. First-party cookies: Are sent to the user's computer or device from a computer or domain managed by the editor, and which provides the platform or service requested by the user.
- b. Third-party cookies: Are sent to the user's computer or device from a computer or domain not managed by the editor, but rather by another entity that processes data obtained from the cookies.

Cookies can be classified as follows, depending on the purpose:

- a. Strictly necessary cookies (technical): The cookies that allow the user to browse a website, platform or app, and use the various options or services on it. For example, control traffic, identify data or session, access restricted access sections or content, remember the elements of an order, complete an order purchase process, manage payment, control fraud related to service security, use security elements during browsing, complete an application to register or participate in an event, store content for publishing videos and audio, enable dynamic content (for example, loading animation of a text or image) and share content on social media. As they are strictly necessary, technical cookies are downloaded by default when they are needed to display the platform or provide the service requested by the user.

- b. **Functionality or customisation cookies:** These cookies are needed to remember information so that the user can access the service or platform with specific characteristics that can differentiate their experience from that of other users. For example, language, number of results displayed when the user runs a search, appearance or content of the service based on the type of browser used, or the region from where the service is accessed, etc. Not accepting cookies may cause slow website performance or poorly adapted recommendations.
- c. **Analysis cookies:** These cookies can quantify the number of users, sections visited on the platform and how users interact with it to carry out statistical measurement and analysis on use, in order to implement improvements based on the analysis of data on how users use the platform or service.
- d. **Behavioural advertising cookies:** Are those which store information on user behaviour obtained from continuous observation of their browsing habits, which allows us to develop a specific profile for displaying advertising adapted to these habits. These cookies allow for the most effective management possible of any advertising space the editor has included directly or in collaboration with third parties.

### **3. What are Cookies used for on our Platform?**

Cookies are an essential part of our how Platform works. The main goal of our Cookies is to make your browsing experience as easy and efficient as possible. For example, they are used to remember your preferences (language, country, etc.) when browsing and during future visits. We also use our Cookies to continuously improve our services and Platform, and to offer customised advertising according to your browsing habits.

Information collected on Cookies also allows us to improve our Platform by making estimates on statistical data and patterns of use (number of visits, most visited sections, visit time, etc.), gain a statistical understanding of how users interact with the Platform so as to improve our services, and to adapt the Platform to your individual interests, accelerate searches, etc.

We may sometimes use Cookies to obtain information that enables us to display advertising, from our Platform, third-party platforms or any other means, based on an analysis of your browsing habits (products visited, sections consulted, etc.).

In any case, the Cookies we use never store sensitive information such as passwords, credit or debit card details, etc.

### **4. How can I manage the use of Cookies on this Platform?**

When you disable cookies, whenever possible, the affected cookies are deleted from your browser and, in any case, when you reject a cookie but it is not possible to delete it, we always proceed to block it. Therefore, we will never use the cookies you reject and we will do our best to delete them (please note that certain deletion mechanisms are beyond our control, as they depend on the third party responsible for the cookie).
